SUMMARY

Senior Backend Developer with over 11 years of professional experience, proficient in JavaScript/Node.js and Python with additional frontend experience in React.

Currently a Senior Software Developer at [Ledgible](#), an Atlanta-based startup focused on cryptocurrency and taxation, building tools that simplify workflows, increase automation and reduce errors.

SKILLS

Programming	JavaScript/Node.js, Python, C#
Frameworks	React.js, Express.js, Flask/FastAPI
Cloud and DB	GCP, Firebase, MongoDB, SQL Server
Misc	TDD, SOLID, Jest, Kubernetes, Docker, Serverless, Linux, GraphQL, REST
Personal projects	TypeScript, Golang, AWS (certified), Terraform

WORK EXPERIENCE

Senior Software Developer, Ledgible

Nov 2021 - present

Crypto tax and accounting platform, Atlanta · Node.js, MongoDB

- Built agentic workflows that automatically handle data gaps in our system.
- Refactored the platform's queue structure, eliminating a persistent class of race conditions.
- Rewrote the transaction tax categorization system, replacing an architecture that had become difficult to extend.
- Shipped an integration with Wolters Kluwer tax software, simplifying how users file their taxes.
- Designed an internal API for the Support team that automated their daily tasks, cutting manual work and speeding up ticket resolution.
- Delivered platform features including batch tax categorization, new exchange integrations, wash-sale rule handling, staking-reward tracking, new reports, stronger audit logging, and performance improvements.

Senior Software Developer, FS/EXA

Oct 2019 - Oct 2021

Software house building products for telecom companies · Node.js, Python, GCP, Firebase

- Built the shared GraphQL backend powering FS Ensina and Mulheres Positivas, replacing per-platform backends and saving the company roughly \$100,000.
- Cut content upload time from 5 hours to 20 minutes by building an internal React tool that let the commercial department publish directly to the learning platform.
- Engineered an ETL pipeline with Kubernetes CronJobs, Python/Pandas and Pub/Sub/Cloud Functions to ingest and process new customers, with CI/CD automated through Docker and Jenkins.
- Integrated a partner's system with our JIRA through a Python/Flask service, so their requests opened tickets automatically instead of arriving by hand, making support faster and more responsive.

Software Developer, Blip

Jun 2019 - Sep 2019

Chatbot platform · C#, Node.js, Python

- Developed a REST API to recognize domain-specific expressions, slang and emojis, and maintained Nextel's chatbot using the company's in-house tooling.
- Wrote a Node.js tool to parse and query chatbot definition files, and automated UX reporting with Python and Google Sheets for the BI and UX teams.

Software Developer, FitBank

May 2017 - Jun 2019

Payments fintech — digital accounts, bank-slip payments · C#, SQL Server

- Built and maintained C# microservices, delivering new features and improving existing ones.
- Sole reviewer for every pull request before it reached production, catching bugs and driving code improvements across the team.
- Interviewed and hired new developers, ran the technical evaluation, and mentored junior engineers and new hires on the codebase and on engineering practice.

Junior Software Developer, FHS

Oct 2010 - Jun 2013

Banking systems for investment banks · C#, VB6, SQL Server

- Converted a banking MVC application from VB6 to C#, maintained the legacy VB6 system alongside it, and wrote SQL Server stored procedures and triggers.

EDUCATION & CERTIFICATIONS

2026 **AWS Certified Developer – Associate**, Amazon Web Services

2013 - 2016 Advertising (incomplete) at **University of São Paulo**
